

## Elite 681

270° Seamless Glass | Dual-Chamber ATX Showcase Case

The Elite 681 redefines showcase builds with its **panoramic 270° tempered glass panels** and true **dual-chamber layout**. Designed for high-performance systems, it combines refined aesthetics with cutting-edge airflow engineering. From **vertical cooling support** to **extensive radiator compatibility**, this case is built to handle next-gen hardware with style and precision.

## KEY FEATURES

### 270° Full-View Tempered Glass with Seamless Bevel Design

Dual tempered glass panels with unique 45° bevel edges create a nearly invisible seam for a clean, uninterrupted view of your components and lighting.

### True Dual-Chamber Architecture

Separate chambers for motherboard and PSU/cabling help streamline airflow and simplify installation. The right chamber includes a top-mounted PSU and 95mm of cable management depth.

### Vertical Cooling Configuration

Supports up to 10 fans in a bottom-to-top vertical airflow layout, accelerating heat dissipation and enhancing thermal performance.

### Extreme Cooling Support

Accommodates dual 360mm radiators (top and bottom) and a 280mm side-mounted radiator—ideal for custom water cooling or high-end AIOs.

### Pre-installed ARGB Fan Setup with Motherboard Sync Support

Includes 4 ARGB fans—3 reverse-blade side intake fans and 1 rear exhaust fan. Each fan features daisy-chain connectors for cleaner cable management and streamlined setup, and is fully compatible with major motherboard ARGB software for synchronized lighting control.

### Large Mesh Ventilation Zones

Full-size mesh openings on the top and bottom panels provide superior airflow for improved system cooling.

### Support for RTX 50 Series Graphics Cards

Ready for the latest GPUs, with support for graphics cards up to 410mm in length—ideal for next-gen RTX 50 Series builds.

### Upgraded High-Speed I/O Panel

Features dual USB 3.0 Type-A ports and a USB 3.2 Gen 2x2 Type-C port with up to 20Gbps transfer speed—perfect for fast data access and modern device connectivity.
